### ChartReader

Portable printer to download data in list or graph mode  
EI-CR-MEM

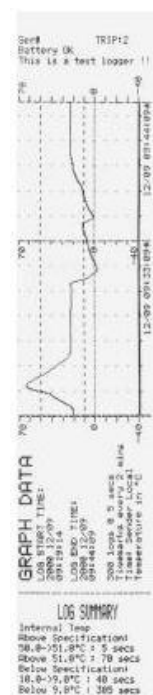

The Escort iLog ChartReader allows download and printout of logged readings without use of a computer. Printout can be either in a list of out of specification readings or a graph. With the 1MB memory, multiple sets of downloaded logged readings can be stored in the ChartReader's non-volatile memory for later transfer to PC.

#### Accessories

Item	Product Code	Description
